DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/15/2008 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 8, 11, and 17-20 have been considered but are moot in view of the new ground(s) of rejection.

3. Applicant's arguments regarding the controlling part are held to method steps, though the present invention is held to an apparatus. It is noted that the claimed invention comprises controlling part that perform certain method steps. The apparatus is deemed as incomplete for omitting essential elements of the relationship between that the controlling part and how (with what structure) it performs the recited process steps, such as the apparatus is programmed to perform the steps by comprising an algorithm that has been configured to perform said steps. See MPEP 2106.01 (R-5) that gives guidance for claims dealing with a computer.

4. The arguments and amendment to the claims are to method steps, process limitations and how the controlling part is intended to be used, but does not recite structurally patentable limitations.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1,8, 11, and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claim 1 line 12 should read “a plasma supplied from”

8. Claims 1,8, 11, and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: The relationship between the plasma supply part and the suction part has been omitted and/or requires further clarification.
